

# REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 27

THE REDCLIFF REVIEW

THURSDAY JUNE 1ST, 1939

Number 48

## Young Redcliff Boxer Brings Home Medal

Two Redcliff Boxers Took Part In Boxing Event Friday

Two young Redcliff boxers, Howard Waters 110 pounds and Red Bell 135 pounds, were the only contestants from Redcliff who were entered in the Boxing Tournament held in Medicine Hat last Friday.

A good deal of credit is due these lads, because, with practically no support from the citizens of their own town, they were able to bring home one of the Royal Visit Medals.

In the 110 pound class Howard Waters gave a good account of himself against J. Murphy, a young Medicine Hat boxer. It was a good fight and a close decision, no one among the spectators knowing until the referee's final decision, who the winner might be.

Our 135 pound contender, Red Bell, made a splendid showing, winning the decision over his opponent R. Murphy in three fast rounds of flashy fighting. Red won the first two rounds by a good margin but showed signs of weakening in the third owing to the terrific pace and lack of training.

This should prove to the people of Redcliff that we have the material here. All that is lacking is a properly equipped gymnasium and the support of the citizens to put Redcliff on the map again in the world of sport.

How about the people of this town displaying a little "umph" and doing something along this line.

Mr. Alfred Nicholson of Calgary is spending a week here with his grandparents Mr. and Mrs. P. Lavelle. He will return to his home at the week-end.

## Many In Town Miss Seeing King & Queen

Thought Arrangements Made To See Them Here

A number of citizens of Redcliff were greatly disappointed last Friday owing to the fact that they were unable to see Their Majesties King George VI and Queen Elizabeth.

Many who went to Medicine Hat earlier in the day to witness the Royal Visit were unable to get close enough to see Their Majesties due to the large crowd.

Information was then circulated that the Royal Train would slow down at the Redcliff station and the King and Queen would stand out on the back of the train.

About five hundred citizens were gathered at the depot, but because of a slip-up some place the train did not slow down and no one was in evidence but the engineer and brakeman.

It looks as though the people of Redcliff "don't live right."

Severe garden damage was reported in central Alberta today. At Red Deer, seven degrees of frost turned potato plants black and cucumbers and other vegetables were injured at Drmhellen.

## FRUIT BUSHES FOR SALE

Sand Cherries,  
Gooseberries,  
Rhubarb Roots,  
Raspberry Canes,  
Potatoes,  
Artichoke Sets

Delivery in April

## Alice Pace Revue Held in Hat Friday

All Redcliff Dancers Made Good Showing

The Dance Revue held in Medicine Hat last Friday evening by Miss Alice Pace was well attended and thoroughly enjoyed by all present.

The different numbers were well presented and showed very definitely that Miss Pace is a splendid instructor and that her pupils are making excellent progress in the art of dancing.

Redcliff pupils were in the majority on the program and their friends and relatives were justly proud of them.

Little Shirley Barr was considered the outstanding dancer of the class and drew forth continued applause, particularly in the number where she two-tapped and skipped at the same time without making a single error. Little Dolores Turner and Jacqueline McCleary were class seconds.

Others from Redcliff taking part in the Revue were Joyce VanWert, Jill Mackenzie, Marjory Fairbairn, Betty Palmer, Ruth Shaw, Flora Saxton, Elsie Blades and Gordon Hulbert.

Congratulations are due Miss Pace and all the members of her class.

Mr. Ray Stuebel is confined to bed at present but expects to be around again in a few days.

Mrs. C. Johansson's many friends will be sorry to hear that she is ill at her home here.

Miss Phyllis Sanderson will leave shortly for a month's holidays at the Coast.

George Ballantyne spent the weekend here with his parents Mr. and Mrs. A. R. Ballantyne. While at Medicine Hat on the 26th, he was fortunate in being able to take an excellent picture of Her Majesty, The Queen.

## Farm and Home At Olds School Of Agriculture

To Be Held From June 26 to 30 For Rural Men and Women

The Department of Agriculture has inaugurated a new summer activity to be known as "Farm and Home Week" at the Olds School of Agriculture.

The purpose of this new feature is to provide men and women of rural Alberta with an opportunity of spending a week at Olds School, living in the school residence, enjoying the campus, examining the experimental plots in the live stock and farm, and at the same time to attend a series of lectures and demonstrations of many phases of agriculture and home economics.

You are cordially invited to attend "Farm and Home Week" which has been arranged for the 25th, to 30th, inclusive.

## Meeting Next Tuesday For Swimming Pool

A meeting will be held in the Legion Club Room on Tuesday night at 8 o'clock for the purpose of electing officers for the swimming pool. All interested are asked to attend.

Mr. Sidney Worts of Pipet, elder son of Mr. and Mrs. G. H. of Redcliff, is to be married on June 7th to Miss Levis of Pipet.

Their Majesties are enjoying a 24 hour rest at Jasper Park, Alberta today.

## BIRTHS

Ambury.—Born at Medicine Hat Maternity Hospital on Thursday, June 1st, 1939, to Mr. and Mrs. A. M. Ambury—a daughter.

McDonald.—Born at Weyburn, Sask. on Wednesday, May 31st, 1939, to Mr. and Mrs. Ross McDonald, to Mr. and Mrs. Ross McDonald (nee Frieda Frey)—a son.—Robert Douglas.

## A Redcliff Couple Celebrate Anniversary

After a Lengthy Discussion They Finally Compromised

To celebrate the occasion of their 36th wedding anniversary, Mr. and Mrs. Albert Teator are taking a short trip together.

It seems Mrs. Teator had set her mind on going west but her spouse was usually determined to go east, so after much discussion they compromised and decided to go to Edmonton by way of Calgary and other points in order not to break the chain.

When in Edmonton they hope to have an opportunity of seeing the King and Queen a little more distinctly than was their privilege in Redcliff last Friday.

The Review joins with their many friends in wishing them a pleasant holiday and Many Happy Returns.

Gardens in almost all parts of town are coming along nicely. Many of the earlier varieties are ready for home consumption.

Mr. J. F. Kane of Calgary was in town for a short time today on his way to Morinjav to attend a convention. While here he was visiting with his daughter, Miss Anna-Marie, Kane of the local teaching staff.

The honor of presenting the bouquet of Edmonton grown flowers to Her Majesty on the occasion of the Royal Visit to the Alberta capital, has been given to the little granddaughter of Premier Aberhart, nine year old Beverly K. McNutt.

## VEGA REBECCA LODGE

SALE OF WORK AND HOME COOKING

AT ODDFELLOWS HALL

JUNE 7th 1939, 2.30 - 6 P.M.

Tea, 25c, Menu—Raisin Bread, Brown Bread, White Bread, Strawberry, Short Cake, Light Cake, Dark Cake.

Tea Cup, Reading by Madame X  
NOVELTIES - 5c EXTRA

## Invade The Golden Eagle's Domain

The Sky-Line Trail Hikers and Trail Riders of the Canadian Rockies will share with golden eagles and white mountain peaks the greatest, mile-high alpine meadows and scenic beauty of two of the loveliest sections of the Canadian Rockies on their annual outings this summer.

Starting each year from Banff Springs Hotel, the Riders on horseback and the Hikers on foot, explore new sections of the Rockies. Carefree days are passed canoe-hunting big game, fishing in virgin lakes, roaming in alpine meadows, mountain climbing, or basking in the sun, rescued from solitary company by the imitations performed thrice daily by the coo.

The Trail Riders will leave Banff Springs Hotel early Friday, July 28, riding in easy stages over the scenic Sky-Line to Mountain Lake in the Valley of the Ten Peaks, where they will hold their closing Pic-Nic on the evening of Tuesday, August 1. A day's rest is a most interesting location is provided enroute.

The Hikers will make headquarters at a central camp in beautiful Flathead Valley, north of Lake Louise, August 4-7, and spend their time exploring the high country.

The Trail Riders and Trail Hikers of the Canadian Rockies' plans for this year are being received enthusiastically by nature lovers all over the world, judging from the number of inquiries reaching the secretary, J. M. Gibson, Windsor Station, Montreal.

## Canadian Pacific Hotel Chefs Arrange to Cook Royal Meals

Halfway hotels, the Chateau Frontenac at Quebec City, Banff Springs Hotel in the Canadian Rockies, and Empress Hotel at Victoria, B.C.

On the day of their arrival from England, May 15, Their Majesties will be guests at a state luncheon at noon and a state dinner at night in the Chateau Frontenac at Quebec City. Chief Chef Louis Baskiers, who has cooked for two former British Kings, and other world-famous figures will be in charge of both functions, assisted by Chef Harmon Charles Emil Perry, European culinary expert and chef of the famous summer restaurant, Algonquin Hotel, St. Andrews-by-the-Sea. Master chef Harry Drewery, who has had world wide experience will supervise the banquet hall arrangements.

At Banff Their Majesties will enjoy their only real holiday of the trip and the cooking of Chief Philippe Vignal, formerly of Paris, London, New York, Montreal, Italy and China, assisted by Chef Perry. Their Majesties will be at Banff for dinner May 21, three meals May 22, and breakfast May 23.

The Empress Hotel at Victoria, B.C., furthest west of the Canadian Pacific trans-Canada chain, will be the scene of a state luncheon at noon and a state dinner at night. Their Majesties will be at Victoria for dinner May 25, breakfast May 26, and breakfast May 27.

Before joining the Canadian Pacific in B.C., Mrs. and Chief Perry of Quebec will assist. From left to right are Chefs Baskiers, Perry, Anderson, Vignal and Maître d'Hotel Drewery in circle.

## Should War Come

Fleet of United States Not Far From New York Paper

On Washington's Capital Hill earnest men and women are debating what America's stand should be, come war. But time, we believe, will prove this debate largely academic. For if war breaks out between Rome, Berlin and the Paris-London bloc, the whole future of the United States and of every man, woman and child in it will be at stake from the first crack of a gun.

That will be so whether we have a neutrality law or not. A defeat for Britain and France would reduce them to second-rate powers. Their fleets would be taken over by the victors. The new balance of power would be Europe and Asia against the two Americas. We, as the one strong American state, would have our hands full. We would have to spend billions upon billions to strengthen our national defense.

We would have to provide a fleet in the Atlantic at least as large as the combined fleets of Britain, France, Germany and Italy, because all these would be under our control. And in the Pacific we would have to provide a fleet as large as Japan's. We would have to maintain a navy more than double the size of the one we have. And if the latter costs \$400,000,000 a year to maintain, the upkeep of the larger establishment would be at least a billion.

But that would be only the beginning. As communications improved and distances shrank the danger of invasion would, of course, increase. Canada, Mexico, Central America and Northern South America would be particularly vulnerable and from them we could be taken by land as well as by sea and air. That means we must defend ourselves in much the same position as the nations of Europe. We would have to maintain an enormous standing army, perhaps a million men, to guard our far-flung frontiers.

Today we have an army of 184,000 men. This cost us \$1,000,000,000 annually. An army a million strong would cost us approximately two billion dollars annually. Add another billion for an adequate air force and our defense budget would foot up to something like four billion dollars a year.

If what we have said above is true, and we are convinced it is, then for us there are only two avenues of escape. One is named peace. The other is named victory—for Britain and France if there must be war.

Expert opinion is that the chances on peace or war are now about 50-50, and about the same as to which side will win. Thus victory or defeat might well turn on a few planes or a few guns for this side or that.

We, therefore, venture a prediction. If and when it becomes evident that Britain and France are to "plan" guns, or other arms from America to save them from defeat, these weapons will be taken in hand, regardless of what Congress may or may not do about neutrality or embargoes now.—New York World-Telegram.

## A Rare Discovery

Skull of Neanderthal Man Is Unearthed in Italy

The Italian government has announced a rare archaeological find, the skull of a Neanderthal man near Terracina, on the coast between Rome and Naples.

Archaeologists were excavating for objects belonging to Romans of about 2,000 years ago. Instead they found a skull which scientists estimated was between 80,000 and 120,000 years old.

Although the Neanderthal race, now extinct, once was widespread in Europe, the skull was said to be the first of that age discovered in Italy.

World Probably Change

A girl from Toronto, now on a farm near Kincardine, Ont., writes home to say she is learning to milk cows and reports she does "I'm learning on my trying to be patient, and helpful." It's to be hoped the young lady gets on to the bang of the thing before by time arrives or she may have to revise her opinion of the cow's attitude.

To Ward Off Curse

Sir Anthony and Lady Douglas-Titchborne assisted in the building of this year's annual bounty of four to the villagers of Titchborne, near Alresford, England. Adults received a gallon and children half a gallon. The distribution is a very ancient custom to ward off "a curse on the inheritance."

Reporter: "Congratulations! You've just won £2,000 cash, £5 a week for life, a world cruise, and a pedigree dog!"

Winner: "What breed?"

## Death Rays Reach Far

Are Millions of Miles Long Says Texas Observatory Director

The pictures of the heavens as seen from earth, such things as comets and meteors now are, it was completed with the end of ceremonies dedicated to the new 25-inch telescope at McDonald Observatory, Fort Davis, Texas.

Instead of constellations, astronomers now detect such things as death rays millions of miles long, highways where stars travel to and fro, dusty sky deserts, a special content of stars near the earth, and light that does not come from stars. This new galactic map covers what is going on just beyond the reach of man's vision, especially among the stars of the Milky Way.

The latest addition to the map, discovered in the last few weeks by the "eye" of the world's second largest telescope, is surprisingly vast clouds of hydrogen in and about the Milky Way. This was reported by Dr. Otto Struve, director of the new observatory.

Hydrogen, he said, makes up nearly the entire mass of this interstellar gas. Some of this hydrogen is glowing. Its light is not due to heat, but to the ultra-violet rays given off by hot stars in the vicinity of which the hydrogen clouds are true "death rays."

They reach out for about 300 light years, the distance light will travel in 300 years. This is their "effective" distance, within which they can cause detectable disturbances in hydrogen and other gases in space.

The heavenly highways are what astronomers call "star circling." This describes observations that travel to and fro along some of the sky, in large numbers, as compared with other stars.

The sky deserts are clouds of dust and gas, probably well sprinkled with large chunks of matter like the rocks and boulders. These chunks are thought to be the same stuff that make meteors.

Evidence of the continent of stars near the earth was reported by Dr. Otto Struve, director of the new observatory. The photo cell has revealed galactic light, rays which do not come from stars. Galactic light is the light of illumination which is left after the photo-electric "eye" eliminates four other kinds of light sky illumination.

## Menace To Navigation

Ripple Rock In Seymour Narrows To Be Removed

At least Ripple Rock, that old-time menace to navigation in Seymour Narrows, is to be removed. For 30 years it has been the subject of petitions and complaints, but at last it is to go.

Four fathoms below low water it lies, but the rubbing idles that swirl through Seymour Narrows cause powerful ships to become unmanageable with the surge caused by this obstacle in the shipping channel. Engineers estimate that the removal of the rock will save lives and property, and will also save time and the disruption of passenger schedules.

Opposition for long came from Vancouver, which has houses of honor on the C.N.R. apex Seymour Narrows with a railway bridge, using Ripple Rock as a base for a central pier. The change in the railway station in Canada, and the coming of the air, planes, have rendered that hope vain. Coastal and fishing skippers will without regrets, say "Goodbye, Ripple Rock!" It has been a goodly obstruction to our growing coastal traffic.—Vancouver Province.

## In The Old Days

The Toronto Star says when dad was a young fellow he put on his coat and was dressed for business. Saturday afternoon he took off his coat and was dressed for sports. Different from today, when a fellow is so exhausted by the effort of choosing the correct pullover that he's hardly able to choose the right shirt.

## A Bachelor Village

A Department of Agriculture vote of 120 to 120 to improve roads in the village of Totocotes, Scotland, may remove its stigma of being a "bachelor village," the argument being it was impossible to get married because of the difficulty of getting food to the houses.

## Purgenee His Right

With the right to inspect all commercial vessels leaving England for a foreign port, Philip Cabot, descendant of John Cabot, 15th century explorer, Hereditary Grand Pilot, does not consider his privilege.

The glass industry was introduced into Bohemia from Venice in the thirteenth century, its chief centres being Prague, Kiger and Carlsbad.

The average whale has a commercial value of approximately \$1,000.

## DISTRIBUTING NEW BERTS TO CANADIAN VETERANS IN OTTAWA

Maroon-colored berets, with a yellow crown, being distributed to registered veterans. They were worn during the visit of the King and Queen at Ottawa. Our photograph shows Major W. R. Lattimer, Registrar at the Calgary House, Ottawa, receiving applications from veterans, while at the back is Frank W. Potts, secretary of the Ottawa branch of the Canadian Legion.

## Won Without Trying

Woman From Wales Drove Lucky Prize At Glasgow Exhibition

Clachan, which in Gaelic means "a place of good fortune," also spells good fortune for Mrs. F. L. Williams of Llanidloes, Wales. She was the ninth visitor to the Clachan at the British Empire Exhibition at Glasgow last summer. And her surprise reward included expenses covering a trip to the Scottish Clachan at the New York World Fair.

Mrs. Williams is to be given a special reception at the World Fair, and is to spend about ten days seeing the sights of New York. Mrs. Williams told how she won the prize. She and her husband were passing through Clachan on their way to Fitchburg when they thought they would like to see the little Scottish village at the exhibition. When they reached the Glasgow Fair ground they found excited crowds round the turnstile into the Clachan.

She was soon the centre of interest. Photographers surged round her and she was introduced to the organizers of the exhibit, who told her she had won not only the visit to the United States, but also a trip to the Western Isles, a tea service, travelling rug, and some lengths of Scottish tweed.

## An Indian's Excuse

Court officials heard a new one at Cobourg, Ont., when an Indian appeared to answer a liquor charge. Asked where he obtained the liquor, the Indian quickly replied: "I don't know where I got it, but I got drunk when I went there for it."

Unusual tire pressure will cause front wheels of automobiles to shimmy.

A tropical lizard, the flying gecko, glides from tree to tree by expanding fruit from its sides.

## Just Astonished

"An' why did I keep my boy in after school?" asked the indignant mother. "I asked him who George VI. was and he just stood and looked at me," replied the teacher.

"Huh!" said the indignant mother. "It's dumfounded the boy no doubt was by my ignorance."

Special wedding commissions are effected by Albanian brides by smothering their faces with a preparation of lemon juice and sugar, applied boiling hot.

## ALBANIAN SOLDIERS GET NEW JOBS IN HOME

Assigned to guard duty at the royal palace in Rome, these former Albanian soldiers are inspected by General Parlani, under-secretary of war. Note the resemblance between the general and El Duce.

## Hardy Hedge Plants

Many Native Shrubs Can Be Used For Prairie Hedges

The attractive, scruffy fruit and extreme hardiness combine to make the Silver Cholla, Shepherdia, argentea, one of the most desirable plants for prairie hedges. A trimmed hedge of this shrub, set out in 1912, at the Northern Experimental Station, is still in excellent condition. The dense clusters of bright scarlet berries which cling to the branches well into the winter add to its decorative effect. Unfortunately, the flowers are imperfect, the standards and pistillate blossoms being on different plants. Care should be taken to include both kinds when planting, or disappointment may result.

Another excellent hedge plant is the Saskatoon. Ornamental in flower and fruit, trimmed or untrimmed, it is generally the first to be covered with a pleasing green foliage in spring.

The native plum makes a good trimmer or untrimmed hedge. The Siberian crab deserves mention. Untrimmed and planted four feet apart, it makes a good live winter nibbling the birds and thus protecting the tree. A hedge of White spruce, set out in 1912 and kept trimmed is still in good condition. Woody Caragana, Siberian Pea Tree, Pincherry, common Lilac, and Amur Lilac have proved their worth as reliable hedge plants over a long period of years.

For a low hedge, Pymy Caragana, Siberian Almond, and Peking Pear are satisfactory. A very attractive little hedge planted in 1913 was a hedge of the Siberian Crab. It is still in good condition and has always a neat, well-kept appearance.

## Hard To Understand

Why Some Nations Forget Lesson Taught By World War

"If an inhabitant of Mars came down here and saw the world as it is, he would think this a queer place. There are several billion people on earth. They have split up into many groups called Nations. These Nations have fought each other since before the Christian era, and only 20 years ago many Nations had just concluded a great war in which nearly 8,000,000 men were killed or died, and nearly 22,000,000 were wounded. So terrible was that war that people said it was the last war that would ever be fought; that it was a war to end war. The lesson was such that it seemed mankind would never commit itself to such folly again."

Yet today, we find more money spent and to be spent on war preparations than ever before in history. We find the head of a great state—Germany—saying other nations if they really believe in peace, let them attack them. We find him inquiring if they will join him in an agreement not to attack each other. The latter may be to the good. But it is a commentary on civilization that the experience of 1914 to 1918 such a thing should be necessary. If such conditions applied in the case of the experience of 1914 to 1918 such a thing should be necessary. If such conditions applied in the case of the experience of 1914 to 1918 such a thing should be necessary. If such conditions applied in the case of the experience of 1914 to 1918 such a thing should be necessary.

Being regarded as vermin, rabbits are not allowed to exist in Denmark. Their extermination has been ordered in Belgium, Germany and Sweden, also.

Michigan runs first in big game animals in the United States, Pennsylvania second and California third.

## Could Not Oblige

Gurnsey Unable To Fill Order For Domestic Servant

Inside a barrel of Canadian apples sent to a firm of fruit merchants at St. Martin, Gurnsey, Channel Islands, Varshevanian T. Carré found a "housekeeper" in the barrels. When he was asked to fill the order, he was told: "bearing the address of a farmer in Kingston, N.B., Carré has written to the farmer, saying the domestic servant shortage is severe as acute there as it is in Canada."

## Record Of Some Kind

David G. Young believes he holds the commuting record for Scotland. For nearly 21 years he has travelled 23 miles from his home in Bridge of Allan to Glasgow and back again six days a week, 50 weeks a year. This makes a yearly mileage of 19,800 and a grand total of 1,001,880 miles. And he never missed his train.

Linters, the tiny tufts of cotton clinging to cotton seeds, are used in 26 percent of the cotton seed and are useless for anything but cushions, horse collars and flims.

Japan "confers immortality" on her soldiers killed in battle. It is cheaper than pension.

Insects eat about one-tenth of all the food grown in the United States.

## WORLD HAPPENINGS BRIEFLY TOLD

Arthur J. Cody, 60, fourth cousin of the late Col. William (Buffalo Bill) Cody, plainsman and showman, died at his home in London township, Ont., from a heart attack.

The triplets of Shakespeare will be the scene in July, 1940, of an international aeronautical conference on the supplies of the Royal Aeronautical Society.

After a half-century of waiting, J. H. W. Kemmle, Edmonton, has received a Hiel revolver medal from Ottawa. He served with the Moose Mountain Scouts.

James E. Hardy, 64, once one of the world's greatest serialists and noted particularly for crossing Niagara Falls on a tight wire in 1896, died recently in Toronto.

Income tax collections in Canada during April totaled \$13,973,731, compared with \$13,923,553 in April, 1938, the national revenue department announced.

Nearly 5,000 miles of khaki, enough to stretch across the Atlantic, now is being worn in Yorkshire mills to clothe Britain's troops in the field.

Concepts and the "doubled" territories, each numbering 200,000 men.

Rejecting suggestions for drastic economy measures, P.M. for their Michael Savage declared that "reduced wages would destroy Britain's market in New Zealand."

Moreover, the burden threatens to be higher, "said the leader would destroy New Zealand's market in Britain."

British youths called up for military training under the conscription act will be paid one dollar during the first month of training.

Planned in New Zealand, the conscription act announced in its request for supplementary credits.

## Headache Treatment

Say Oxygen Can Relieve And Heal

Many Allergies

A new method of treating migraines, headaches, gas gangrene and other diseases is reported as an unexpected development from experiments in stratosphere flying and deep-sea diving.

Three scientists of the Mayo clinic, Rochester, Minn., exhibited to members of the American Medical Association at St. Louis, Mo., for their 90th annual convention, how cheap oxygen can relieve and heal many ailments which might otherwise be fatal.

The new treatment resulted directly from experiments in cooperation with the United States army, navy and various airlines. Dr. Walter M. Doolittle, Dr. W. R. Lovell and Dr. A. R. Hubbard found that the oxygen mask which they had developed for aviators was a highly useful aid to medicine.

## Depends On Diet

Eggs With Pure White Yolks Have Been Produced

Colorless egg yolks, white as snow when hard-boiled, were described by Kansas State College chemists to the American Chemical Society at Baltimore.

The yolks turn white when hens are fed on a ration free of carotenoids in the yellow nutrient, carotene. The chemists said snow white egg yolks are "nothing new" but they are finding useful facts for egg producers in effects of fat-food on color of yolks.

One troublesome color is olive-green yolks. "These colors cause considerable loss to poultrymen as customers shy at eating them. At Kansas State they now produce green yolks at will by feeding the hens molasses and cast grains."

## Hidden Document

Paper Establishing British Rule In New York Is Found

Hidden for 263 years, a document establishing British rule over New York has been found and brought to America.

The document, signed by King Charles II in 1667, authorized Edmund Andros to take possession of the colony, then ruled by the Dutch and called New Netherlands, was discovered in possession of the Andros family in England. Acquired through a gift by William Byrnes Benjamin, the document has been placed in exhibition by the New York Historical Society.

## Rapid Expansion

New enterprises expand rapidly but none more so than animal delivery. In ten years animal letters sent from England have increased from a half million to a hundred million each year.

What puzzles us is why so few people get too hard up to buy gasoline.

The Philistine of the Bible may have come to Palestine from Crete.

## Where Safety Lies

Armed Host of Britain Is Her Only Defense

The London Daily Mail says the Hitler attitude to the world is contemptuous. But the limit of humbug was reached when the totalitarian States proved their contempt for indignation at Britain's increased rearmament programme.

They said our 186,000 defence expenditure was a violation of the spirit of Munich. Well, Hitler has killed Munich. Now perhaps Britain may be allowed to defend herself with a force called Persepolis.

Mr. Chamberlain was right to couple Munich with wholesale rearmament. Who doubts that now? Our safety depends upon our own armed might. Our preparations must be intensive. We must be ready to stand alone, if need be. It would be folly to rely upon visionary schemes of collective military action.

## Cost Of Armaments

Estimated That The World Is Spending A Billion A Month

The Bank for International Settlements estimated the world is spending \$1,000,000,000 a month on armaments.

Based on statistics which the bank said were incomplete but nevertheless showed the trend of defence expenditure, the estimate said that the world was spending \$1,000,000,000 a month on armaments.

Repeating suggestions for drastic economy measures, P.M. for their Michael Savage declared that "reduced wages would destroy Britain's market in New Zealand."

Moreover, the burden threatens to be higher, "said the leader would destroy New Zealand's market in Britain."

British youths called up for military training under the conscription act will be paid one dollar during the first month of training.

Planned in New Zealand, the conscription act announced in its request for supplementary credits.

## Gardening

Staking

Dahlia, tomato, large cosmos or nasturtium, young shade trees, new plants and shrubs in early spring should be supported while they are getting started.

For tall individual flowers or tomatoes, 6-foot stakes of wood or bamboo are desirable and they should be stuck in the soil with soft twine or raffia. Stakes are perhaps longer stakes will be used with shade trees.

For smaller flowers and shrubs, the smaller flower stakes will be used with shade trees. With vines getting ready to cling to fence or wall, staking is used to get them started.

It is a good plan to start gardeners to use started annual flower plants of the kinds mentioned above for planting among tulips and other spring flowering bulbs which will be in the ground by the time the new plants are started.

They need something to hide dying plants. Magically, the plants will always be useful for filling any blind spots in the perennial beds where winter has been usually severe.

## The Woman Juror

A Little Explanation By The Judge Changed Her Mind

The judge was about to hear an action in the High Court when a woman juror asked and requested exemption from service on a plea that she was a non-believer in capitalism.

"But this is a civil action," the judge explained, "and has nothing to do with religion or politics. You must serve."

She was brought to the court by a woman who had been asked to serve. She was brought to the court by a woman who had been asked to serve.

"Oh, indeed, is that?" replied the juror, "I have no objection to serving."

She was brought to the court by a woman who had been asked to serve. She was brought to the court by a woman who had been asked to serve.

"Oh, indeed, is that?" replied the juror, "I have no objection to serving."

She was brought to the court by a woman who had been asked to serve. She was brought to the court by a woman who had been asked to serve.

"Oh, indeed, is that?" replied the juror, "I have no objection to serving."

DAN F. WILSON

## Radio Talk

Industrial Development Board Of Manitoba Is Branching Out

When we all everyday citizens hear or read of an organization such as the Industrial Development Board, that is paraded with Emersonian approval and we automatically wish it well and give it our endorsement.

But as everyday citizens of Manitoba don't you think we should know about how it functions? It is necessary, and what does it mean to each one of us.

Historical fact is, statistics, unless you want them, can be tedious. And if these few words answer your interest we can go into them later.

We will treat this subject as if we are talking of the Industrial Development Board for the first time and we will confine ourselves to one phase of it in which I am keenly interested, namely "New Industries".

You all know Emerson's adage of "He who builds a better mousetrap, the world will be kind to him and will trade to his door"—there is of course a grain of truth in this but unless that manufacturer of mousetraps brings the advantages of his mousetraps to the public who are troubled by the mice I think his mousetraps will not be sold.

Manitoba is just in that position; it has a mousetrap but it is not selling it. It is necessary to bring the advantages of his mousetraps to the public who are troubled by the mice I think his mousetraps will not be sold.

Manitoba is just in that position; it has a mousetrap but it is not selling it. It is necessary to bring the advantages of his mousetraps to the public who are troubled by the mice I think his mousetraps will not be sold.

Manitoba is just in that position; it has a mousetrap but it is not selling it. It is necessary to bring the advantages of his mousetraps to the public who are troubled by the mice I think his mousetraps will not be sold.

Manitoba is just in that position; it has a mousetrap but it is not selling it. It is necessary to bring the advantages of his mousetraps to the public who are troubled by the mice I think his mousetraps will not be sold.

Manitoba is just in that position; it has a mousetrap but it is not selling it. It is necessary to bring the advantages of his mousetraps to the public who are troubled by the mice I think his mousetraps will not be sold.

Manitoba is just in that position; it has a mousetrap but it is not selling it. It is necessary to bring the advantages of his mousetraps to the public who are troubled by the mice I think his mousetraps will not be sold.

Mr. D. S. Rose is in charge of  
the work being undertaken.

Mrs. Geo. Kitchen left for Cal-  
gary last week to spend a month  
visiting with her parents.

Mr. and Mrs. J. Dutton left to  
visit friends in Piapot, Sask.  
last Sunday.

Rev. and Mrs. H. S. Hammett  
and Mr. Sanderson left on Monday  
for Regina where they will at-  
tend the Tynod Conference of the  
Diocese of Quappelle being held  
there this week.

A committee composed of Mr.  
and Mrs. Alex Paterson, Mrs. J.  
Kitchen and Mr. H. Johnson  
left last Wednesday to attend  
the Canadian Legion Convention  
in Calgary. They are expected  
to be there all week.

A meeting of the Redcliff Girl  
Guides was held last Monday  
evening in the St. Ambrose Par-  
ish Hall. There was a large at-  
tendance and everyone reports an  
enjoyable time. Mrs. Broadby  
held the lucky ticket for the beau-  
tiful quilt, the drawing for which  
was made at this meeting.

Mr. Jas. Jardine, formerly of  
Redcliff but now of Lethbridge,  
was one of the delegation appoint-  
ed by the people of Lethbridge  
to represent that city in Medicine  
Hat last Friday to meet the King  
and Queen. Mr. Jardine was  
accompanied by his father and  
mother who were also former  
residents of Redcliff. They  
were all in Redcliff on Saturday,  
where they renewed many old  
acquaintances. Many will re-  
member Mr. Jardine Sr. who op-  
erated a clothing store here a  
number of years ago, just east of  
the Canadian Legion building.

**GORDON MEMORIAL**

Sunday - June 4th, 1939.  
10.00 A. F. Sunday School  
11.00 A. M. Morning Worship.  
The minister will be in charge  
and the Quarterly Communion  
Service will be held at this time.

Mr. and Mrs. C. T. Hall, who  
are holidaying in California for  
a few weeks, report an enjoyable  
trip

Work commenced this week on  
our main street, Broadway,  
which is hoped will make a  
big improvement.

Miss Irene Buchholz, who is  
teaching in Hilda was a weekend  
visitor with her parents. Mr. and  
Mrs. C. Buchholz.

Mr. and Mrs. Albert Tester  
left on last night's train for Ed-  
monton to see the King and  
Queen on their return tour across  
Canada.

Mr. G. W. Mellor is installing  
over his store a neon sign which  
will be in operation by tonight.  
It will bear the words Palm  
Ice Cream.

On several occasions during  
the past week, a beautiful dis-  
play of fireworks was seen in  
front of Sam Dar's Restaurant,  
which were greatly enjoyed  
by the young people.

as a Life Insurance Policyholder

Your savings in life insurance make you a

co-owner of carefully selected securities -

investments made in accordance with Govern-

ment requirements and widely diversified for the

safety of yourself and upward of 3,500,000 other

Canadian policyholders.

You own a share of the bonds of our Dominion

and Provincial Governments, and municipalities.

You also have a substantial stake in the public

utilities, in the industries, and in the homes and

farms of Canada.

Today, more than Two Billion life

insurance dollars are at work through-

out the Dominion - financing worth-

while projects, aiding employment,

contributing to Canada's progress.
